# All Hands On Deck

The Jobs that Make Canadian  
Seafood Sustainable and  
Sought-After

**Processors**

A lot of processing is actually done on the water right after harvest in an on-board factory facility.

Many fishing vessels have entire floors dedicated to processing to preserve freshness at the source.

Land-based processing facilities are also significant job providers in coastal communities.

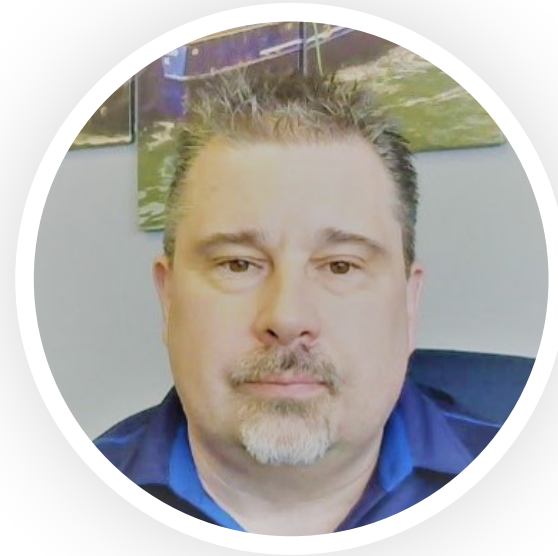

# We work in... Processing

**Joycelyn Moulton**

Quality Assurance  
Coordinator, Ocean  
Choice International

**Darren Stuart**

Director of Plant  
Operations, Connors  
Bros.
